## PREMIUM CONCRETE & SUPERIOR CRAFTSMANSHIP THAT YOU CAN TRUST

---

Concrete is the most widely used material in the world. It is essential for commercial, residential and agricultural construction projects. In fact, concrete is essential in our modern day life – from interstate highways and airport runways to the sidewalks in your neighborhood. While concrete itself is a simple material, making beautiful concrete that lasts is a blend of art and science, and this does not happen by accident. Since 1989, DURA-CRETE® concrete has been manufactured using high-performance, quality ingredients, and it is installed by annually Certified Contractors following the proven, time-tested guidelines of the American Concrete Institute and the Portland Cement Association's Cement Mason's Guide.

*Performance and versatility: DURA-CRETE® is an ideal choice for driveways as well as stamped and colored sidewalks, patios, pool decks and walkways. A list of annually Certified Contractors is provided on our website [www.cemstone.com](http://www.cemstone.com) for your convenience. Cemstone is not responsible for the acts, obligations or liabilities of these companies or services of any listed companies.*

---

## DURA-CRETE® IS YOUR BEST OPTION

---

DURA-CRETE® concrete combines top quality materials, cutting edge technology and systematic installation procedures to yield a finished product that not only withstands the punishment of our extreme climate but that also enhances the beauty and value of your property, now and for years to come.

### **COST EFFECTIVE**

Over its expected service life, the operating cost of DURA-CRETE® remains considerably less than that of any other paving material. While the initial investment in DURA-CRETE® may cost more than other paving methods, the durability and low maintenance costs of concrete save you money in the long run. Asphalt may cost less initially, but it requires frequent and regular maintenance to continue to perform.

### **TROUBLE FREE**

DURA-CRETE® resists water penetration, and it is designed and constructed to resist the effects of freezing and thawing. DURA-CRETE® concrete is long lasting and durable, scientifically engineered to withstand our harsh climate of extreme heat and bitter cold for years with a minimum of maintenance. In fact, DURA-CRETE® concrete actually gains strength as it ages!

---

The DURA-CRETE® Ready Mixed Concrete Program warranty assures your concrete surface from developing any surface defects resulting from inferior materials or workmanship. This includes the occurrence of coarse aggregate popouts, scaling, spalling or delamination. If a defect should appear within five years of the installation of your DURA-CRETE® concrete, the owner understands and agrees that the liability of Cemstone or the Certified Contractor is limited to the breaching party replacing or repairing the defective concrete. The decision as to whether the defective concrete will be repaired or replaced shall be made at the sole discretion of the breaching party.

---

# INSTALLATION PROCEDURES

---

## QUALITY MATERIALS & QUALITY CONTRACTORS

The installation of DURA-CRETE® concrete is performed by an annually Certified Contractor who will follow a standardized set of installation procedures for your projects.

### BASE

The base will consist of compacted, uniform, drainable material. This will prevent undesirable movement under the slab.

### DESIGN

Your project will be designed to your specifications for dimensions and shape, and will be formed for specific thickness and use of control joints, as the job requires.

### MATERIALS

All materials used to produce DURA-CRETE® concrete shall conform to ASTM C94 standards.

### PLACEMENT

The Certified Contractor will conform to the DURA-CRETE® installation procedures to ensure a premium finished product.

### CURING AND SEALING

DURA-CRETE® Concrete will be cured and sealed to facilitate strength gain and to provide the density needed for durability.

### ***CEMSTONE'S MISSION***

*is to achieve the highest standards of excellence in the building materials industry with dedicated people committed to exceeding customers' expectations through technology, quality and service.*
